Ganesh Kumar

MERN Stack Developer | Backend Specialist | Cloud & DevOps
6206715572 | ganesh620671@gmail.com | linkedin.com/in/ganesh/ | github.com/ganeshk6 | Portfolio | LeetCode

Education

Rajiv Gandhi Prodyogiki Vishwavidyalay **Sept. 2025 - present**
Master of Computer Application

Dev Bhoomi Uttarakhand University **Sept. 2021 - June 2024**
Bachelor of Computer Application *CGPA - 8.7*

Experience

Full Stack Developer | Script Venue **Oct. 2024 - Present**

- Worked as a **Full Stack Developer** on **Ubuntu-based environments**, ensuring stable and secure deployments.
- Developed and maintained applications using **React.js** (frontend), **Laravel, Node.js, and Express.js** (backend), and **MySQL** (database).
- Implemented **role-based authentication systems** to manage user access and security.
- Integrated multiple **external APIs** such as **Google Maps**, **Google Weather**, **OpenAI**, and other third-party services.
- Designed and built **subscription-based modules** with recurring billing and user management.
- Worked on the **end-to-end project lifecycle** including requirement analysis, development, testing, and deployment.

Full Stack Developer (MERN) | AppMingle Media **Jun. 2024 - Sept. 2024**

- Developed and maintained scalable **full-stack applications** using the **MERN stack (MongoDB, Express.js, React.js, and Node.js)**.
- Designed and implemented **RESTful APIs** using **Node.js and Express.js**, enabling seamless communication between frontend and backend systems.
- Developed a **Cab Booking application**, integrating **Firebase Cloud Messaging (FCM)** for real-time push notifications.
- Built a **multi-vendor eCommerce application** with secure **payment gateway integration** and backend API development.

Full Stack Developer (MERN / PHP-Laravel) | VerveGen Tech Pvt. Ltd.Feb. 2024 - May. 2024

- Developed and maintained scalable **full-stack applications** using **React.js, Node.js, Express.js, MongoDB, PHP, and Laravel**.
- Designed and implemented **RESTful APIs** using **Node.js/Express.js and Laravel**, enabling seamless communication between frontend and backend systems.
- Implemented **database optimization strategies** across **MongoDB and MySQL** to improve application performance and responsiveness.
- Collaborated with cross-functional teams on **project planning, development, testing, and deployment** throughout the software development lifecycle.
- Led backend development for the **Drycleaneo management system**, implementing **REST APIs**, third-party API integrations, and secure **payment gateway integration**.

Full Stack Developer Intern | Hachiweb, Values-Driven Tech **Jun. 2022 - Nov. 2022**

- Gained expertise in **HTML**, **CSS**, **JavaScript**, **PHP**, and **MySQL** through hands-on projects and training sessions.
- Developed interactive **frontend features** with HTML, CSS, and JavaScript, enhancing user engagement.
- Collaborated closely with the team to contribute to the development and execution of projects, providing valuable insights and support as an intern.

Projects

Expense Tracker App | React.js, Node.js, Express.js, MySQL, Sequelize link

- Developed a full-stack **Expense Tracker application** using the **MERN stack** with **React.js, Node.js, Express.js, and MySQL**, using **Sequelize ORM** for database management.
- Integrated **Google Gemini AI API** to provide intelligent **expense category suggestions** while adding expenses, improving automation and user experience.
- Implemented **Cashfree Payment Gateway** with a **premium subscription system**, enabling secure subscription purchases and premium feature access.
- Developed an interactive **leaderboard system** to rank users based on their expense tracking activity and engagement.
- Implemented **expense export and download functionality**, allowing users to download and manage their expense records.
- Designed and implemented **RESTful APIs** using **Node.js and Express.js** for user authentication, expense management, subscriptions, payments, and leaderboard functionality.
- Implemented **role-based access control, subscription-based feature management, and secure API authentication** to protect user data and premium functionality.

Hidden Scotland | React.js, Inertia.js, Laravel, MySQL, Google Maps APIs

- Developed a single-page application using **React.js** with **Inertia.js** to seamlessly integrate with a **Laravel** backend.
- Implemented multiple **role-based logins** (admin, editor, user) with secure authentication and authorization layers.
- Integrated **Google Maps**, **Places**, and **Directions APIs** to enable location search, geocoding, and route navigation.
- Integrated **Google Weather API** to display real-time weather updates for selected locations.
- Designed and implemented **responsive UI components**, ensuring mobile-first, cross-device compatibility.
- Worked with **MySQL** for relational data management, optimized queries, and implemented efficient API responses.
- Configured and deployed application on an **Ubuntu-based server**, ensuring stable production releases.
- Collaborated with international stakeholders to deliver scalable, user-friendly modules following Agile methodologies.

Admin Dashboard | React.js, Chart.js, D3.js link

- Developed an interactive **Admin Dashboard** using **React.js**, ensuring dynamic and responsive components for seamless user interaction.
- Integrated advanced charting libraries such as **Chart.js** and **D3.js** to visualize complex datasets, enhancing analytical and reporting capabilities.

E-commerce | Next.js, Fetch API, Redux link

- Implemented **Fetch API** for efficient data fetching, enabling seamless communication between client-side and server-side components.
- Utilized **Redux** for centralized state management, ensuring predictable state transitions and improving application scalability.
- Built a responsive and user-friendly **Next.js** e-commerce application with optimized routing and performance.

Technical Skills

Frontend: HTML5, CSS, Tailwind CSS, JavaScript, Bootstrap, React.js
Backend: Node.js, ExpressJs Laravel, PHP
Databases: MySQL, PostgreSQL
Programming Languages: Python, JavaScript, TypeScript (Familiar)
Core Concepts: Data Structures & Algorithms (DSA), REST APIs, OOP
DevOps & Cloud: AWS, EC2, S3, IAM, Docker, CI/CD, GitHub Actions
Tools: Git, GitHub, VS Code, Jira, OpenAI API

Achievements

- Participated in the International Technothon hosted by Galgotias College of Engineering and Technology and the National Hackathon at DBUU.
- Participated in and cleared Round 1 and Round 2 of CodeKare'23 hosted by Coding Ninja. link
- Participated in an international-level symposium. link
